ADVISORY

TO : ALL ELECTRIC COOPERATIVES

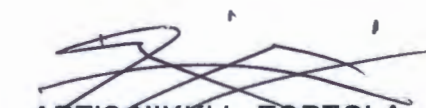

SUBJECT : Department of Education (DepEd)'s School Electrification Program

Please be advised that there is an on-going project called "School Electrification Program" under the Department of Education (DepEd) in consultation with the National Electrification Administration (NEA).

The project aims to provide electricity service to unenergized schools all over the country through line extension projects for On-Grid Schools and utilization of renewable energy for Off-Grid Schools as well as to upgrade existing electrical utilities in schools to provide adequate power supply.

In this regard, all ECs are expected to cooperate and support this project. ECs may coordinate with their DepEd Regional Offices to ascertain if there is an on-going School Electrification Program in their franchise areas. DepEd is also expected to issue a formal letter to ECs requesting for assistance.

For your guidance and compliance.

ARTIS NIKKI L. TORTOLA

Deputy Administrator for Technical Services
