I. Executive Summary

Electric Cooperatives (ECs) are assessed quarterly to measure their compliance to the established criteria on the status of financial, operational, technical, and institutional performance. ECs are also classified accordingly to determine the needed NEA's interventions to improve and upgrade their operations.

Assessment results for the fourth quarter of 2021 showed that 57 ECs were labeled as Green, 49 as Yellow-1, 8 as Yellow-2, and 7 as Red, summing up to 121 ECs evaluated. The particulars are enclosed in this report.

In relation to their financial and operational condition, 100 ECs were able to have at least one-month working capital. Additionally, 77 ECs met the 95% threshold in terms of collection efficiency with 20 ECs being 100% efficient. On their payment status to the generating companies, there were 106 ECs tagged as current and restructured-current; 97 ECs were marked as current and restructured-current on their payment status to the National Grid Corporation of the Philippines; 96 are current on their payment of loans to NEA while 85 ECs are tagged as current on their payment to Banks and other Financing Institutions (FIs). The last parameter for the financial and operational conditions showed that there were 104 ECs with a positive income and 110 ECs with positive net worth.

On the technical criteria, 97 ECs registered system loss level within the standard of 12% or below. Out of the 97 ECs, 63 were with single-digit system loss. Aside from system loss, power reliability was also measured. 112 ECs were compliant to the System Average Interruption Frequency Index (SAIFI) standard while 115 ECs were within the System Average Interruption Duration Index (SAIDI) standard.

On the level of energization, 99 ECs recorded 91% and above, of which, 85 ECs achieved 100% energization level.

Concerning the ECs' compliance on the institutional norms, 108 ECs were categorized as compliant that include 30 ECs having 100% compliance rating.

NEA's assistance and initiatives include preparation of Operation Improvement Plan (OIP), supervision of ECs under private sector participation, and intervention of NEA to ECs such as management take-over, round table assessment, and establishment of new policies and guidelines, among others.

II. Introduction

Overview

The Compliance Report on the Performance of Electric Cooperatives is a quarterly summary of the EC classification. It focuses on the assessment of the ECs' performance on several aspects of operations, such as, financial, operational, technical, and institutional components. The objectives of this report are to evaluate the performance of ECs; to ensure early detection of adverse financial condition; to serve as triggers for NEA intervention in the EC operation; and to institute preventive, remedial, and mitigating measures prior to being categorized as ailing EC. Likewise Section 19 of the Implementing Rules and Regulations (IRR) of RA 10531 mandates NEA to submit quarterly compliance report to the Joint Congressional Energy Commission (JCEC) and to the Department of Energy (DOE).

This report was prepared to assess the ECs' performance during the ***fourth quarter of 2021***. The cut-off date on the data contained in this report was March 15, 2022. This report was approved by the NEA Board of Administrators on April 28, 2022 under Resolution No. 2022-62.

NEA Policies and Guidelines

Republic Act No. 10531, Rule II, Section 5. Powers, Functions, and Privileges of NEA, states that in order to strengthen the ECs, NEA shall help them become economically viable and prepare them for the implementation of retail competition and open access pursuant to Sections 31 of the EPIRA.

Under Rule IV, Section 19, it is specified that NEA shall have the following obligations:

- a. To develop standards, and protocols for the efficient operation of the ECs;
- b. To develop financial and operational parameters to serve as triggers for intervention of the NEA;
- c. To evaluate and categorize ECs based on standards;
- d. To enforce performance standards and submit quarterly reports which shall include summary of compliances to key performance standards and recommendation for rehabilitation in case of ailing ECs;
- e. To protect the interest of the member-consumers and the public in general; and
- f. To create a NEA rehabilitation team to assist the ailing ECs improve its financial and technical conditions.

In compliance, the NEA formulated the Guidelines for the Classification of Electric Cooperatives and Provision for NEA Intervention which was approved by the NEA Board of Administrators in November 2013 and by the Department of Energy in December 2013.

After review of its adoption and implementation, the approved Guidelines for the Classification of ECs was enhanced in October 2020 to give provision for the assessment of performance parameter on System Reliability as well as their amortization payments to NEA and other financing Institutions. The Guidelines for the Declaration and Graduation of Ailing ECs were likewise adopted.

The 2020 guidelines classified the ECs into the following:

- a. Green – ECs which are able to meet all the seven (7) performance standards and parameters;
- b. Yellow-1 – ECs which fail to comply with not more than three (3) key performance standards and parameters;
- c. Yellow-2 – ECs which fail to comply with four (4) or more of the key performance standards and parameters, and ECs which fall under the six (6) circumstances mentioned in Section 20 of the IRR but have not been declared as ailing ECs; and
- d. Red – ECs which have been declared as “ailing” after observance of due process.

Under RA 10531, Section 20. Ailing ECs, an EC may be declared as ailing when it falls to the following circumstances:

- a. Has negative net worth for the last three (3) years. For this purpose, “*Negative Net Worth*” shall mean as the financial condition of an EC in which its liabilities are greater than its assets;
- b. Has accumulated ninety (90) days arrearages in power supply purchases from generating companies and power suppliers/source of electricity, and the transmission charges by the Transco or its Concessionaire;
- c. Unable to provide electric service due to technical and/or financial inefficiencies, and/or institutional problems;
- d. Unable to efficiently perform its electric distribution utility obligations or continue in business due to organizational, external, and internal factors;
- e. When an EC has failed to meet other operational standards established by the NEA; and
- f. Unable to set up or continuously support its Wholesale Electricity Spot Market prudential requirements.

As part of due process, the EC may be afforded a recovery period of not more than one (1) year to undertake remedial and mitigating measures including a doable Operation Improvement Plan (OIP) to be submitted to the NEA for approval. If within a certain time, not exceeding one hundred and eighty (180) days from the implementation of the OIP, there is no sign of concrete and substantial improvement in the operational and/or financial condition of the EC, the OIP shall be set aside and become wholly inoperative and the EC shall be declared as ailing EC.

Key Performance Standards and Parameters

There are seven established standards and parameters used in the assessment of the ECs' financial and technical conditions (Table 1).

Table 1. Established Key Performance Standards and Parameters

Parameter	Standard
Cash General Fund	At least one month working capital
Collection Efficiency	95% and above
Payment to GENCO; NGCP; NEA and other Financial Institutions	Current/Restructured Current
Result of Financial Operation (Before RFSC)	Positive
Net Worth	Positive
System Loss	Within the Cap
System Reliability (SAIDI/SAIFI)	Within the standard set by Philippine Distribution Code: On-Grid – 25 interruptions per consumer per year Off-Grid – 30 interruptions per consumer per year

Classification of Electric Cooperatives

For the fourth quarter of 2021, the ECs were classified as 57 Green, 49 ECs as Yellow-1, 8 ECs as Yellow-2, and 7 ECs tagged as Red (Tables 2-5).

The number of Green ECs continues to vary for the last few quarters with an increase of 9 ECs as compared to 2020 4th quarter while Red ECs remained the same (Graph 1).

Among the three island groups, Luzon, Visayas, and Mindanao, ECs under Visayas performed significantly well as all their ECs were classified as either Green or Yellow-1 (Graph 2).

Sorted by region, comparative analysis of the classification of ECs are also presented (Table 6).

III. Compliance to Key Performance Standards and Parameters

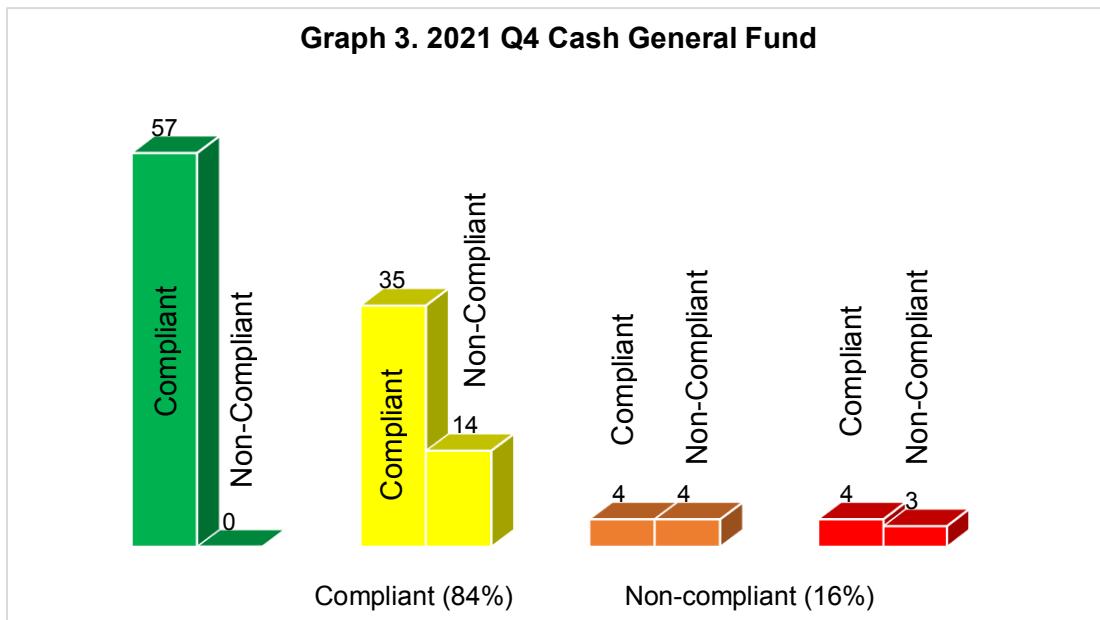

A. Financial and Operational Standards and Parameters

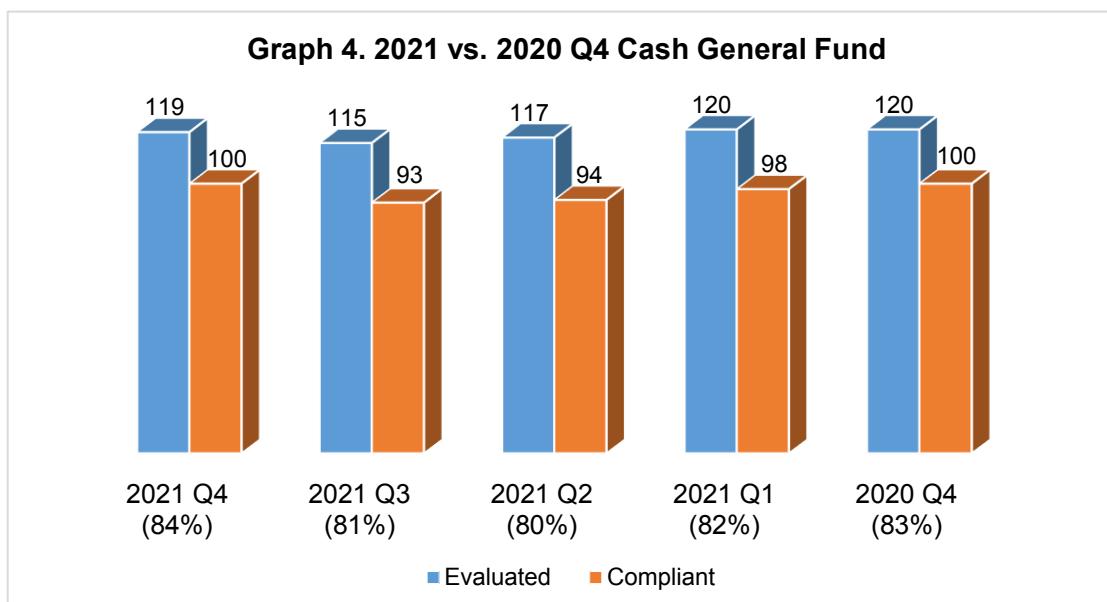

There are five financial and operational standards and parameters used in the classification of ECs. The performance of the ECs is presented in comparison with their performance from the previous year. ECs with incomplete submission or no submission were not evaluated. For specifics, go to Appendix A.

Cash General Fund

This parameter measures the ability of an EC to continue their daily operation for a span of one month. An EC is considered compliant by maintaining a higher working capital fund against the one-month working capital requirement.

Among the 121 ECs, there were 119 ECs evaluated with only 100 ECs being compliant (Graph 3).

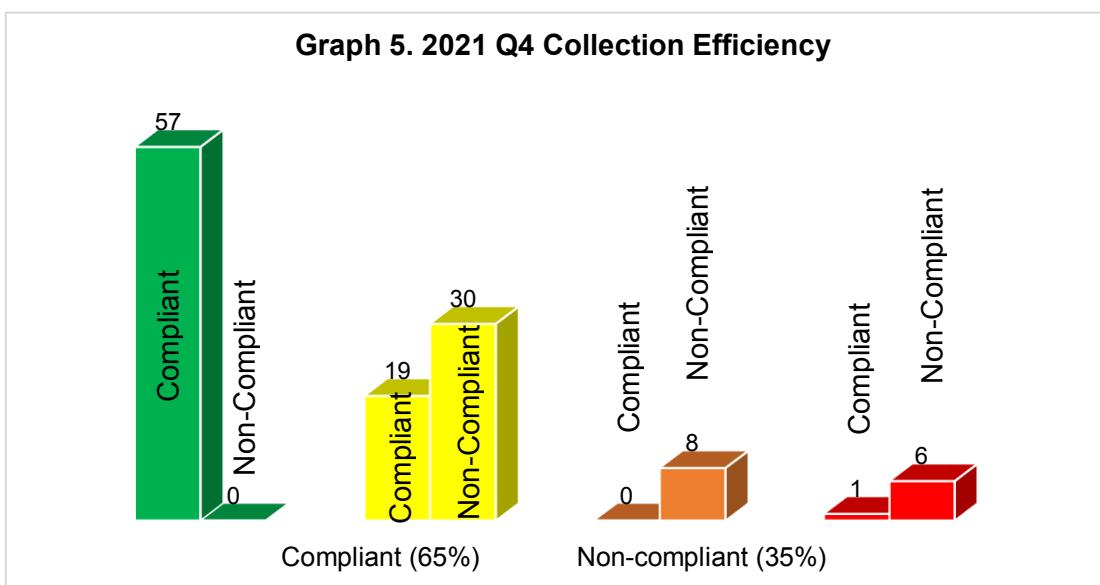

Comparing this quarter's performance from last quarter's results, there is an increase in ECs being evaluated on their financial state based on the ECs ability to operate continuously from 93-100. Likewise, there is also an increase in the level of compliance by 3% compared to last quarter's performance (Graph 4).

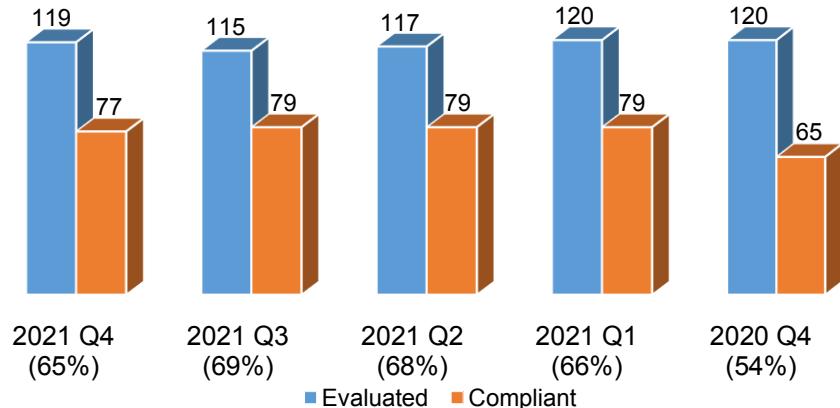

Collection Efficiency

An EC's collection efficiency refers to its capability to collect its corresponding consumer accounts receivables. The standard level is 95%.

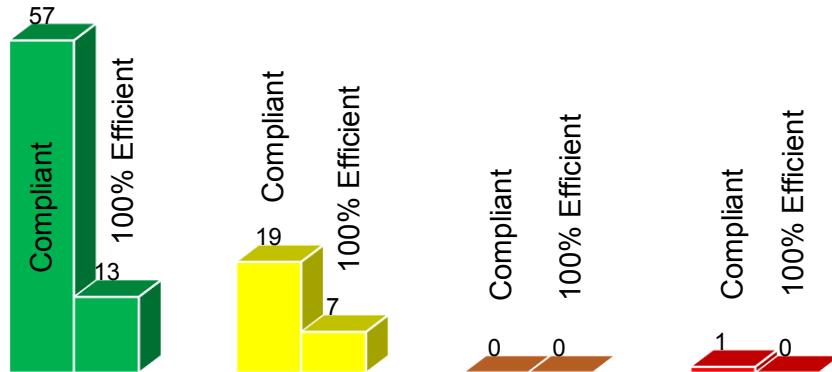

Of the 121 ECs, 119 ECs were assessed and the result was 77 ECs or 65% were able to collect at least 95% of its consumer accounts receivables (Graph 5).

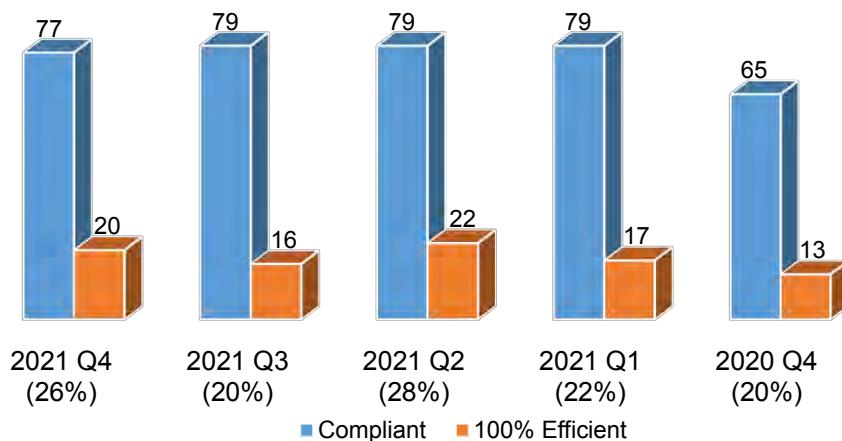

Graph 6. 2021 vs. 2020 Q4 Collection Efficiency

Graph 7. 2021 Q4 Perfectly Efficient Electric Cooperatives in Collection

Graph 8. 2021 vs. 2020 Q4 Perfectly Efficient EC in Collection

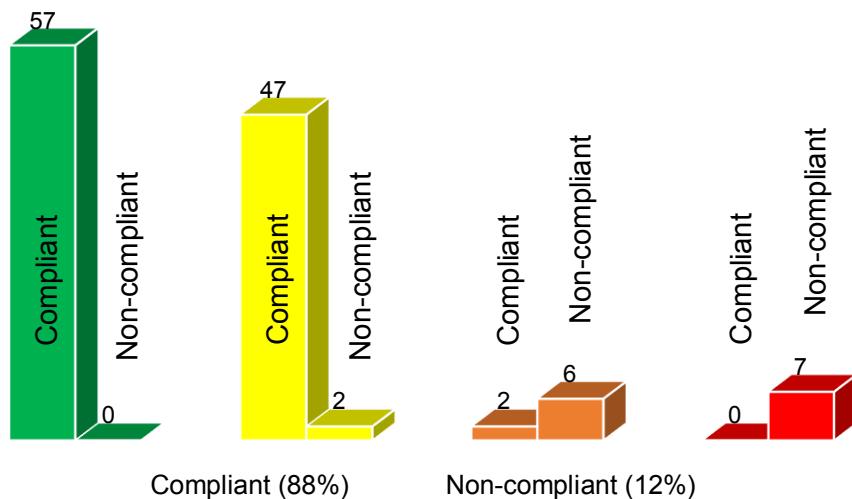

There is a decrease of 2 or 4% in the number of compliant ECs as compared to last quarter. There was, however, an increase in the compliant ECs from 2021 as compared to 2020 4th quarter assessment (Graph 6). Out of the 77 compliant ECs, 20 were 100% efficient. (Graph 7). There was an increase in the number of ECs who were 100% efficient in their collection efforts for the fourth quarter of this year compared to previous year's fourth quarter performance (Graph 8).

Payment to Generating Companies and NGCP

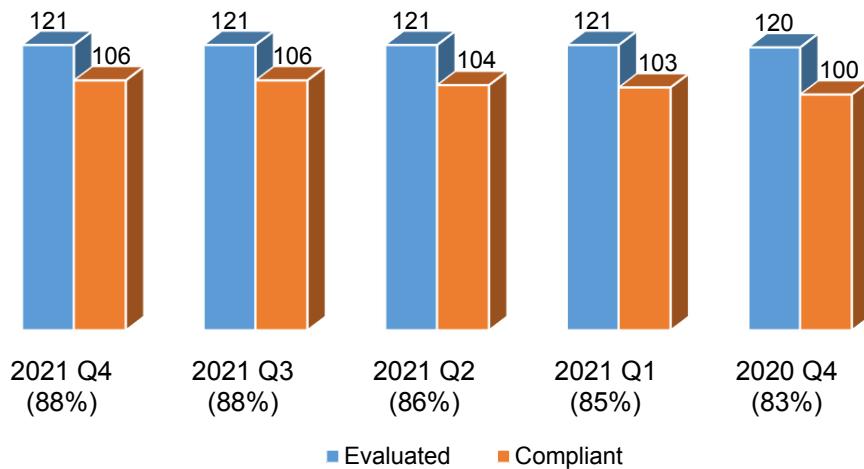

This condition denotes that an EC is compliant if it is able to pay its power accounts to generating companies (GENCO), and its transmission bills to National Grid Corporation of the Philippines (NGCP). A status of “Current” or “Restructured- Current” indicates the capacity of an EC to pay its fees on time. On the other hand, “Arrears” or “Restructured Arrears” shows the inability of an EC to pay its dues regularly.

All 121 ECs were evaluated for their payment to generating companies. Out of the 121, 106 ECs or 88% were with “Current” or “Restructured - Current” status, marking them as compliant (Graph 9). The payment to generating companies are kept within 80-90%, and this quarter, as well as 3rd quarter, is marked as the highest with 88% compliance (Graph 10).

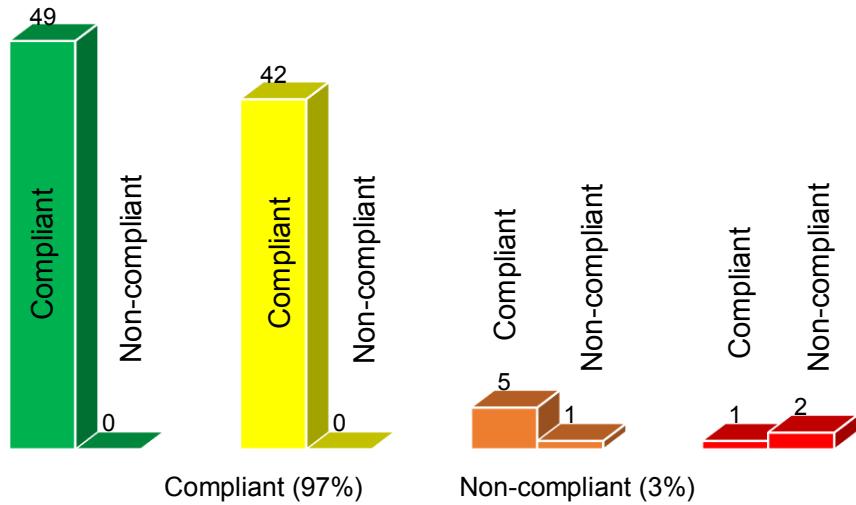

Graph 9. 2021 Q4 Payment to Generating Companies

Graph 10. 2021 vs. 2020 Q4 Payment to Generating Companies

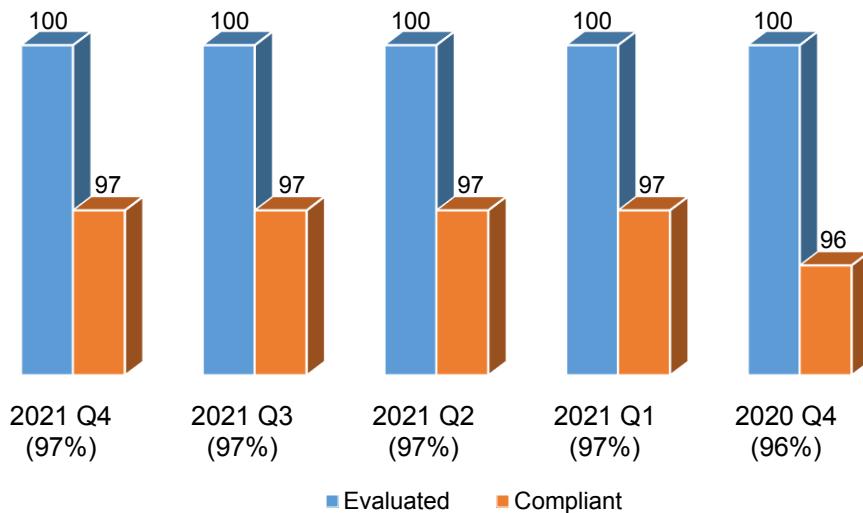

Graph 11. 2021 Q4 Payment to NGCP

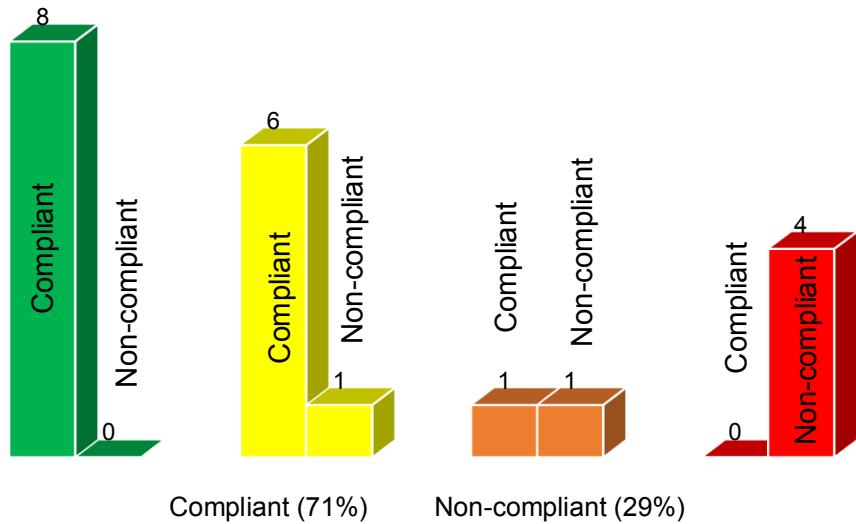

*Excludes 21 SPUG ECs

Graph 12. 2021 vs. 2020 Q4 Payment to NGCP

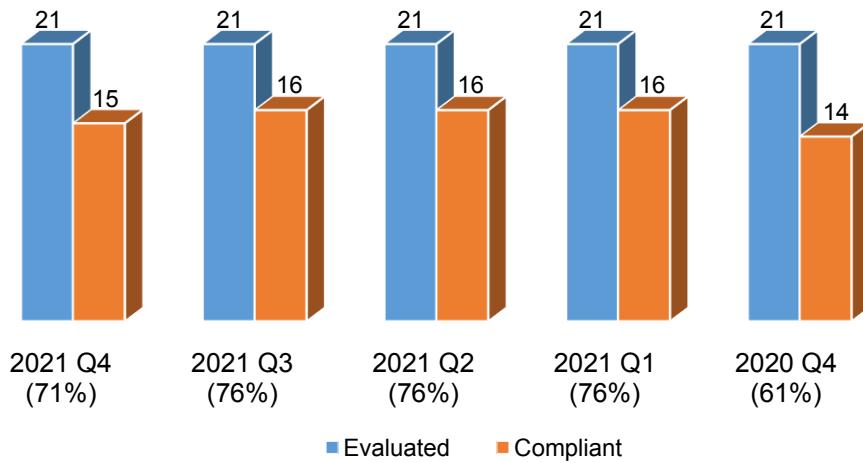

As regards their payment to NGCP, there were 97 ECs marked as compliant (Graph 11) for the fourth quarter of this year. It was observed that the level of compliance is the same for all quarters of 2021 and with a slight increase compared to 2020 4th quarter level (Graph 12).

Graph 13. 2021 Q4 Payment to GENCO by Small Power Utilities Group (SPUG)

Graph 14. 2021 vs. 2020 Q4 Payment to GENCO by Small Power Utilities Group

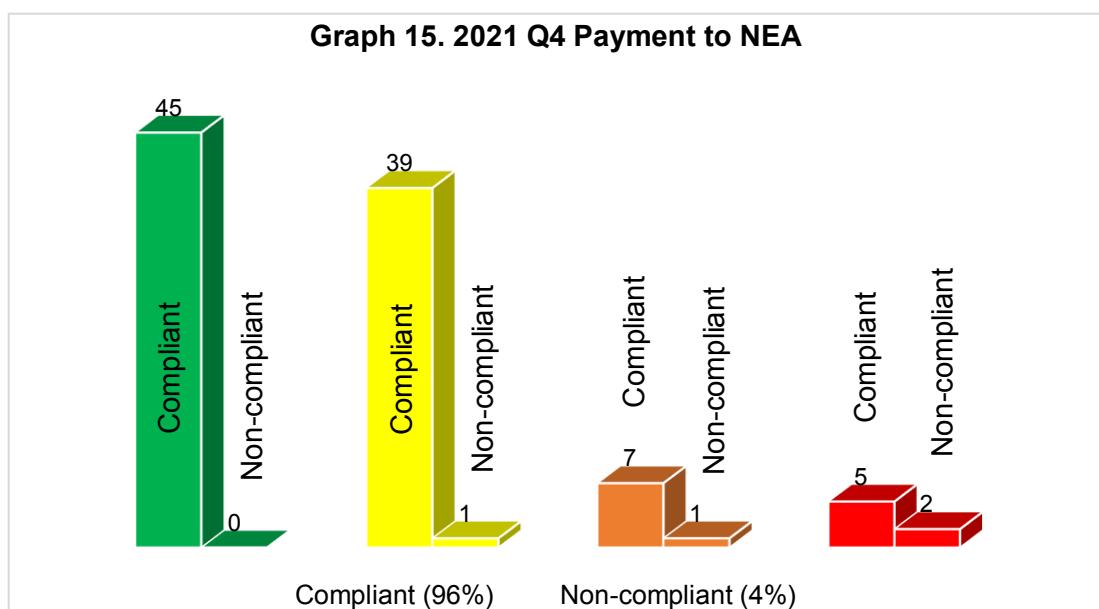

Among the 121 ECs, 21 are labeled as Small Power Utilities Group (SPUG) or off-grid ECs. Among these 21 SPUG ECs, 21 were evaluated, of which 15 ECs or 71% were assessed as compliant (Graph 13). The number of compliant SPUG ECs remained the same for the first three quarters of this year, however, a slight decrease in 4th quarter. (Graph 14).

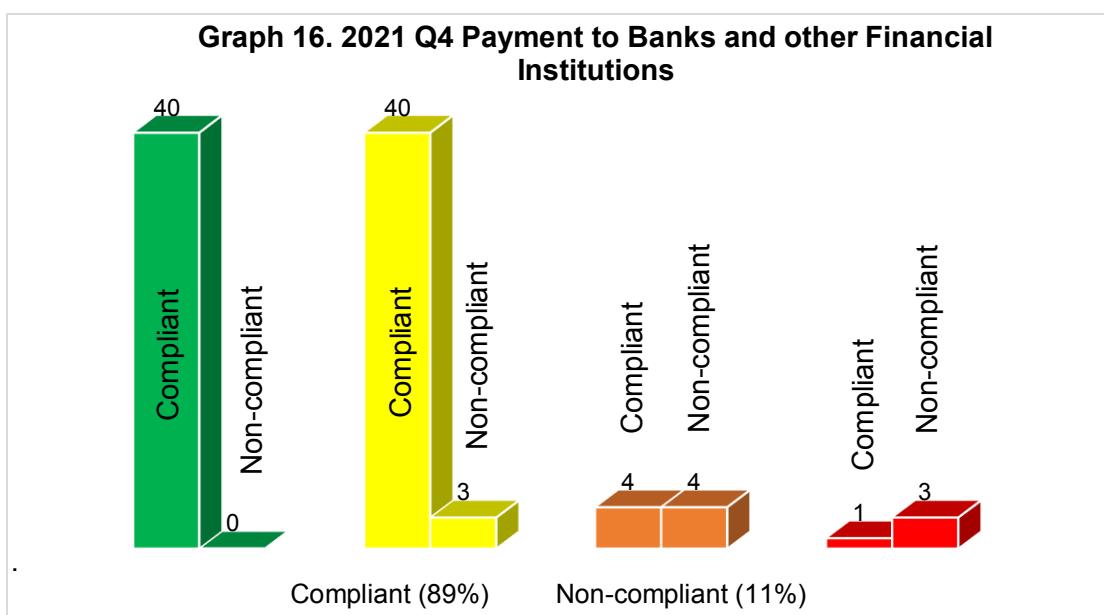

Payment to Financial Institutions (NEA, Banks and other FIs)

This parameter was included in the 2020 Policy for the Classification of ECs to monitor and measure compliance of ECs on their payment of financial obligations to NEA, Banks and other Financial Institutions (FIs). ECs are marked as “Current” or “Restructured- Current” if they are able to pay their amortizations on time. Contrastively, “Arrears” or “Restructured Arrears” shows the inability of an EC to pay its obligations promptly.

Of the 121 ECs, 100 ECs were assessed on their payment to NEA and the result was 96 ECs were current on their payments while 4 ECs were in arrears or they were not able to pay their obligations on time (Graph 15). 21 ECs were identified to have no financial obligations with NEA.

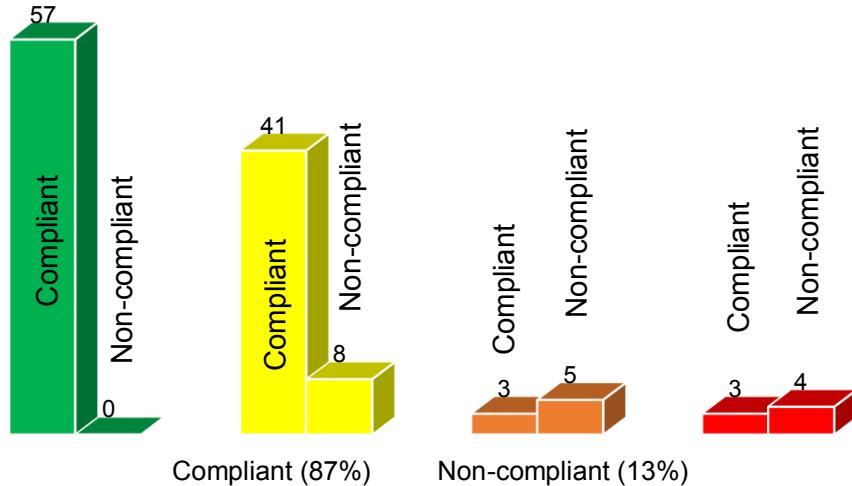

On payment to Banks and other Financial Institutions, out of 121 ECs, 86 ECs were assessed and the result showed that 85 ECs were current while 1 EC is in arrears with its obligations (Graph 16). 26 ECs were identified to have no loans with banks and other FIs for the fourth quarter of 2021.

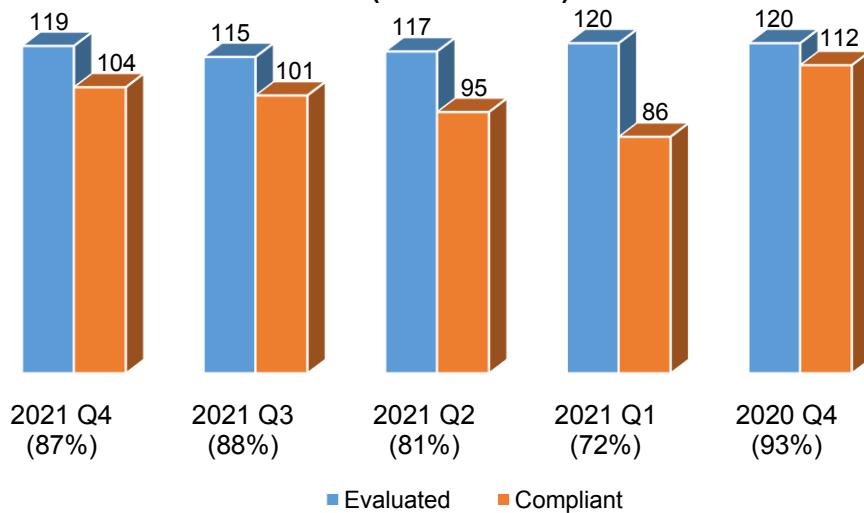

Result of Financial Operation (Before RFSC)

This parameter states the net revenue after deducting all costs and expenses to the total revenue. A positive financial status makes an EC compliant after assessment of performance.

Graph 17. 2021 Q4 Result of Financial Operation (Before RFSC)

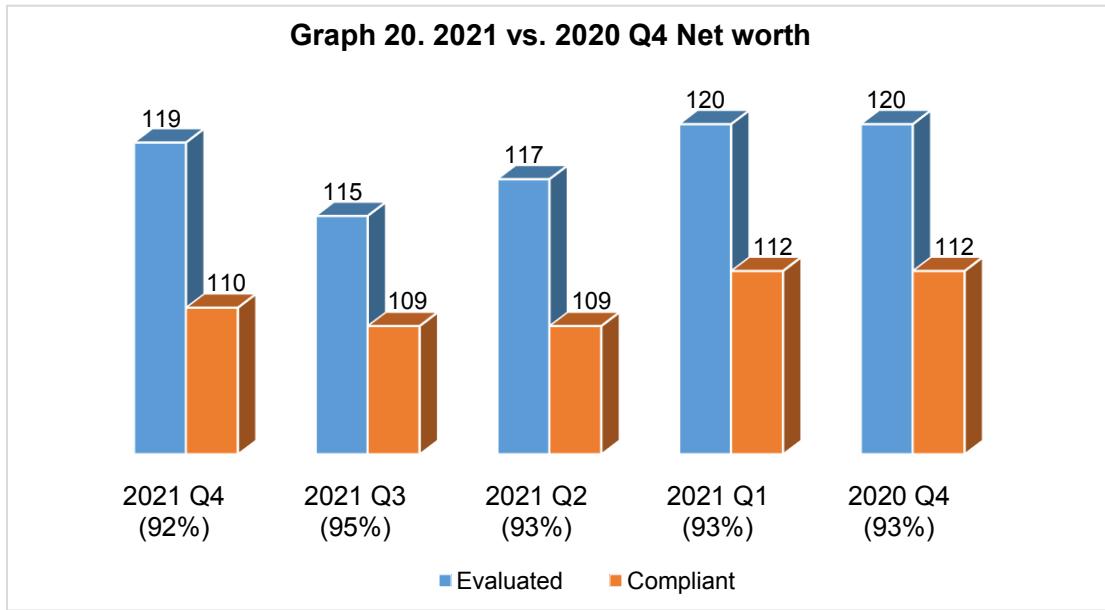

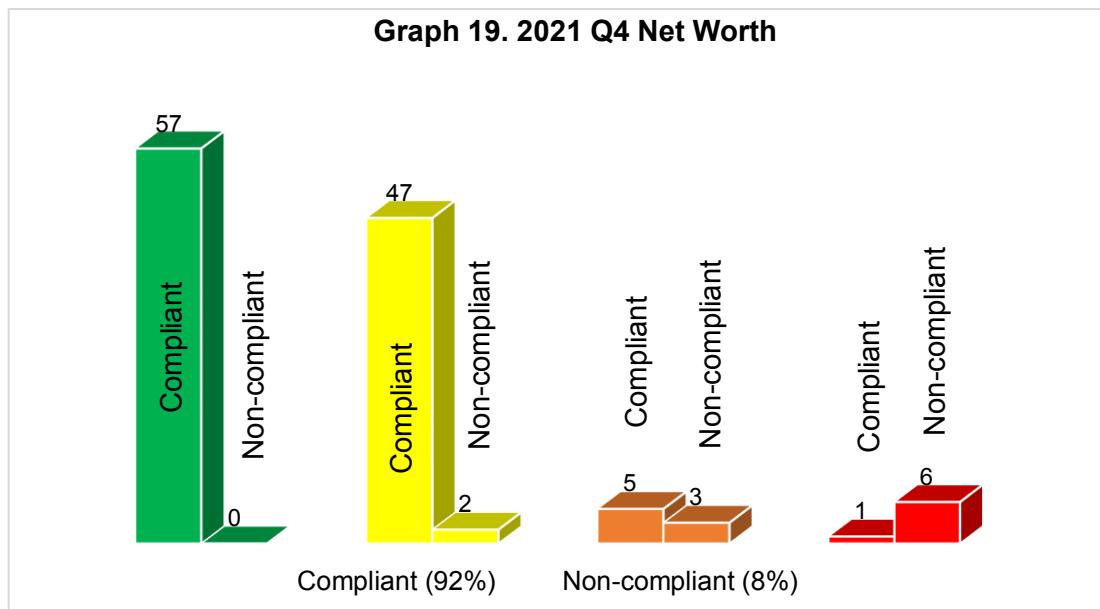

Graph 18. 2021 vs. 2020 Q4 Result of Financial Operation (Before RFSC)

Out of the 119 evaluated ECs, 104 or 87% were compliant, most of which were Green and Yellow-1 ECs (Graph 17). There was an increase in the number of compliant ECs for fourth quarter compared to third quarter of 2021 but there was decrease in the number of compliant ECs for 2021 as compared to 2020 4th performance assessment (Graph 18).

Net Worth

An EC's net worth presents its overall financial state. It refers to the total value of assets after total liabilities. A compliant EC has positive net worth, the condition that assets outweighs the liabilities.

For the ECs' net worth, 110 or 92% out of 119 ECs evaluated have a positive net worth for 2021 fourth quarter financial operations (Graph 19). There is an increase in the number of evaluated ECs for the fourth quarter as compared to the third quarter of 2021 but the percentage level slightly decreased as compared to the fourth quarter of 2020 (Graph 20).

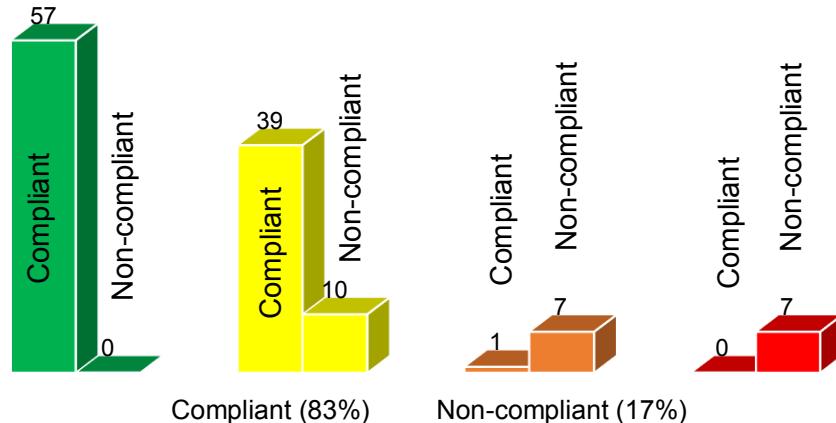

B. Technical Standards and Parameters

For the technical standards and parameters, two conditions are being considered, system efficiency and power reliability. For classifying ECs based on efficiency, only system loss is being utilized and for power reliability, the System Average Interruption Frequency Index (SAIFI) and System Average Interruption Duration Index (SAIDI). The performance of the ECs is presented in comparison to their performance from the previous year. ECs with incomplete submission or no submission were not evaluated. For system loss percentages, refer to Appendix A and for power reliability values, refer to Appendix B.

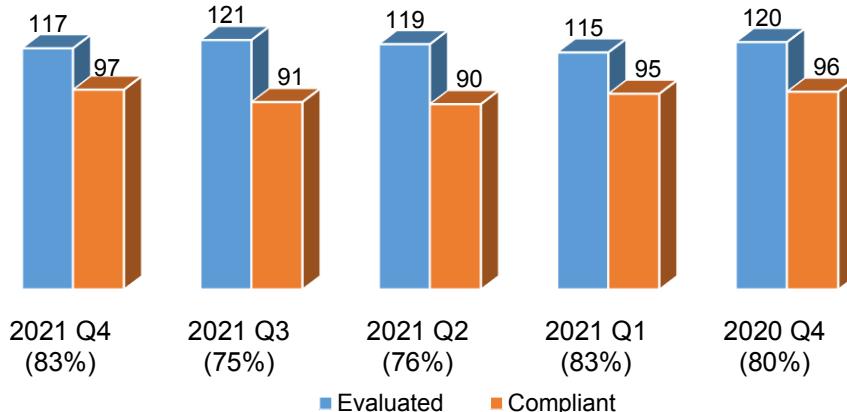

System Loss

This parameter measures the difference between energy input and energy output. It indicates the efficiency of the ECs' distribution system. The standard used for 2021 is 12%.

Graph 21. 2021 Q4 System Loss

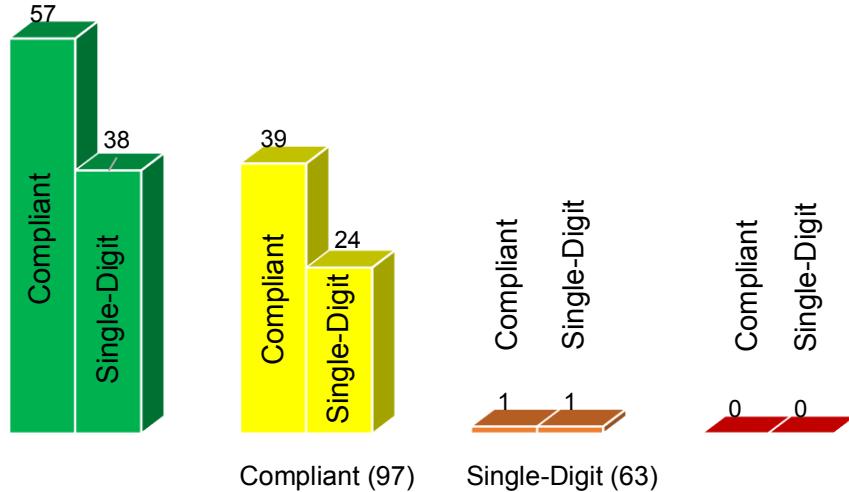

Graph 22. 2021 vs. 2020 Q4 System Loss

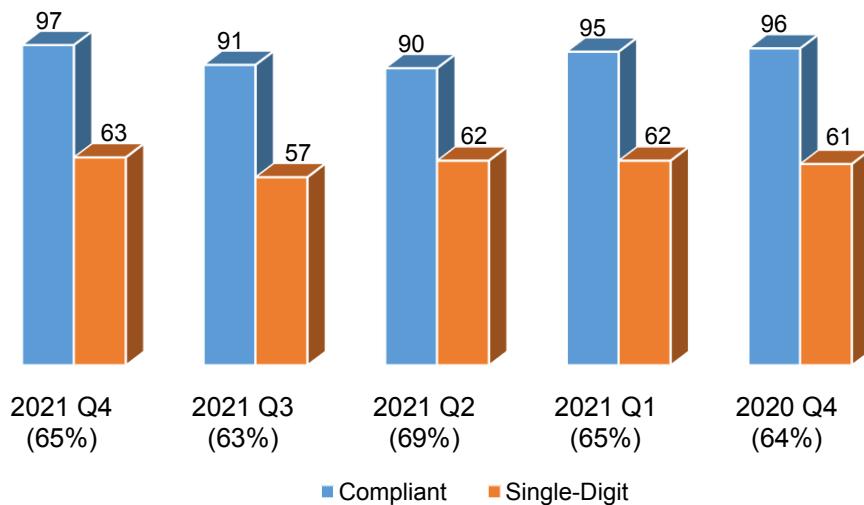

Out of the 117 evaluated ECs, 97 ECs or 83% were compliant (Graph 21). There is an increase in the number of compliant ECs from 91 of the third quarter to 97 of the fourth quarter, however, the number of evaluated ECs decreased from 121 to 117, respectively (Graph 22).

Graph 23. 2021 Q4 Single-Digit System Loss

Graph 24. 2021 vs. 2020 Q4 Single-Digit System Loss

As more ECs meet the standard in system loss, others continue to improve their system to reduce the loss up to a single-digit level (Graph 23). There is an increase in the number of ECs with single-digit system loss for the fourth quarter or a 2% increase as compared to the third quarter of 2021. (Graph 24).

While the number of compliant ECs in the system loss parameter continued to increase, high system loss continues to be a concern. Some of the causes include:

- Pilferages;
- Defective meters;
- Overloaded system;
- Erratic billing cycles;

- e. Delayed implementation of Capital Expenditures project due to regulatory requirements; and
- f. Other concerns such as right of way and old, dilapidated distribution system

To improve the system loss level, the ECs undertake the following programs:

- a. Replacement of defective, malfunctioning, and inoperative kwh meters;
- b. Pole meter clustering;
- c. Vegetation management or right of way clearing;
- d. Line upgrading, line conversion, and line rehabilitation;
- e. Transformer load management which involves load centering of distribution transformer;
- f. Upgrading of overload distribution transformers; and
- g. Strict implementation of Anti-Pilferage and disconnection campaign

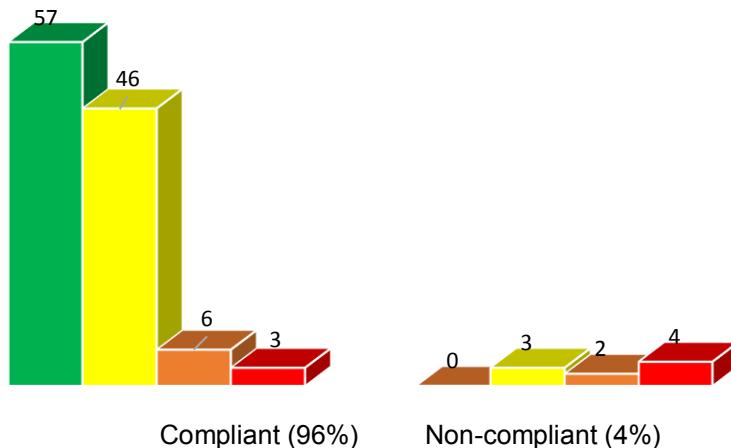

Power Reliability

The electric cooperatives' ability to meet the electricity needs of the end-users is measured by these parameters.

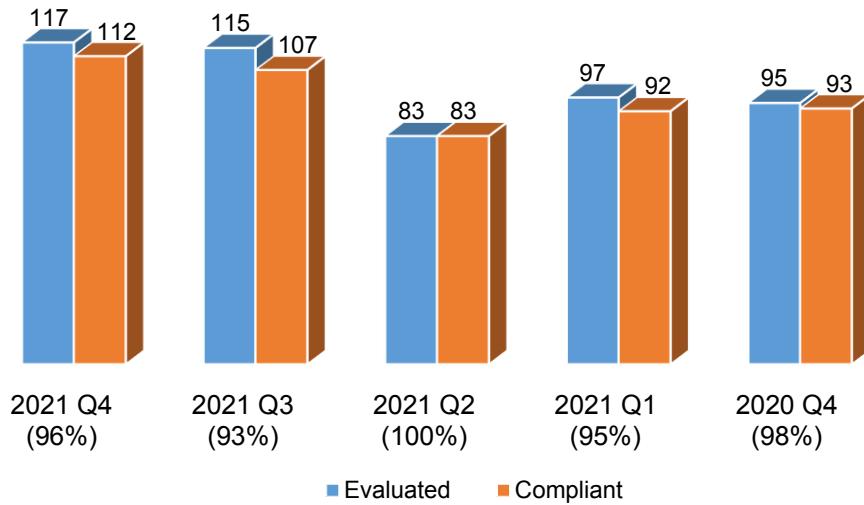

System Average Interruption Frequency Index (SAIFI)

This parameter is defined as the total number of sustained customer power interruptions within a given period divided by the total number of customers served within the same period. For on-grid ECs, the standard is 25 interruptions per consumer per year while for off-grid ECs, 30 interruptions. Out of the 121 ECs, 117 ECs were evaluated and 112 were assessed as compliant to the standard (Graph 25).

Graph 25. 2021 Q4 System Average Interruption Frequency Index (SAIFI)

Graph 26. 2021 vs. 2020 Q4 System Average Interruption Frequency Index

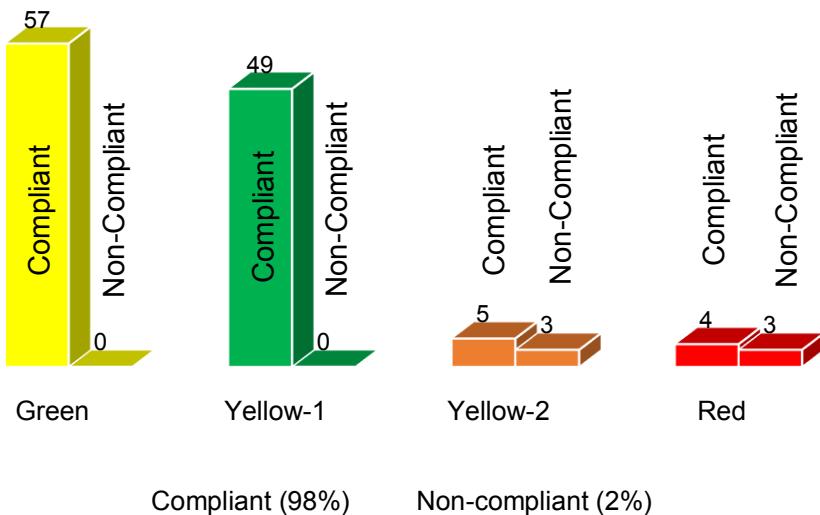

The graph shows that there was an increase in the number of evaluated ECs from 115 of the third quarter to 117 of the fourth quarter. In addition, the number of compliant ECs increased from 107 to 112 for the third and fourth quarter of the same year, respectively. (Graph 26).

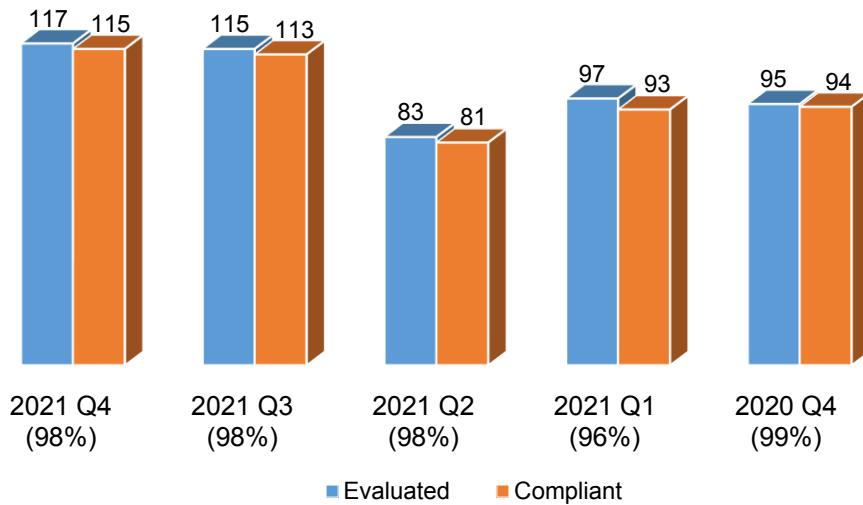

System Average Interruption Duration Index (SAIDI)

The total duration of sustained customer power interruptions within a given period divided by the total number of customers served within the same period makes up SAIDI. The standard is 2,700 minutes per consumer per year for on-grid ECs while 3,375 minutes per consumer for off-grid ECs. For the fourth quarter of 2021, 117 ECs were evaluated, and the result showed that 115 ECs were compliant or with 98% compliance level (Graph 27). It was also observed that there was an increase in the level of compliance by 2% from the first quarter of 2021 to the second quarter, but has remained the same from the second quarter to the fourth quarter of the same year.

Graph 27. 2021 Q4 System Average Interruption Duration Index (SAIDI)

Graph 28. 2021 vs. 2020 Q4 System Average Interruption Duration Index

The level of compliance may have varied from different quarters from 4th quarter 2020 to 4th quarter 2021, but it has maintained the level above 95% (Graph 28).

C. Institutional Standards and Parameters

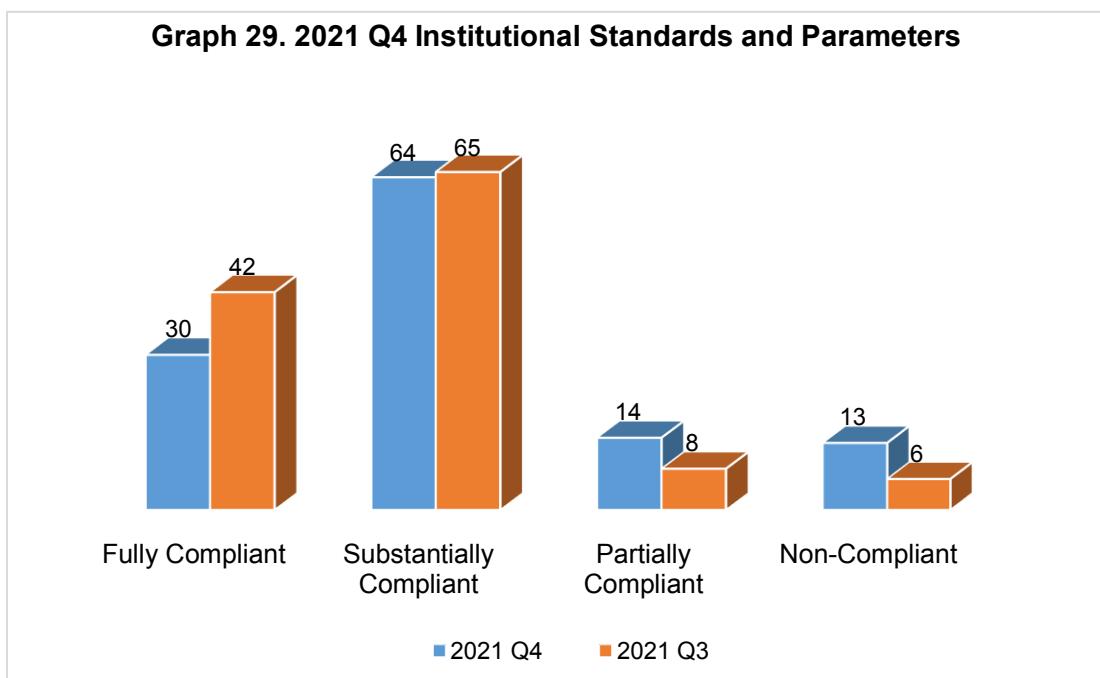

While the institutional norms and principles do not affect the classification of ECs, there are standards and parameters set by the NEA to assess EC performance in relation to management of operations and effective delivery of service to member-consumer-owners. The objective of establishing these institutional requirements is to empower MCOs by promoting active participation and in the activities of the ECs. For 2021, the classification and its corresponding rating was enhanced to demonstrate the actual level of compliance of ECs to the identified parameters. A fully compliant EC must have 100% performance score in the set institutional criteria. In range of 81% to 99%, ECs are considered substantially compliant, 61% to 80%, partially compliant while ECs with 60% and below are considered non-compliant.

The bases of the assessment are good governance, leadership/ management, and stakeholders (Table 7). For overall institutional ratings, see Appendix C.

Table 7. Institutional Standards and Parameters Criteria

Parameter	Weight
Good Governance.	50%
Cash Advances/Power Account Payable	10%
Board of Directors Attendance	10%
Continuing Qualifications	10%
Absence of Verified Complaint	5%
Organizational Restructuring	5%
IT Infrastructure	5%
Audit Rating	5%
Leadership and Management	20%
Employee-Consumer Ratio	10%
Availability of Retirement Fund	10%
Stakeholders	30%
Customer Service Standards	14%
Conduct of AGMA	6%
District Election	6%
Action on Consumer Complaint	4%
Total	100%

For this quarter, 30 ECs are fully compliant, 64 are substantially compliant, 14 are partially compliant, and 13 are non-compliant. In comparison with the previous quarter's data, we can observe that there is a slight decrease in the number of fully and substantially compliant ECs (Graph 29).

IV. Status of Rural Electrification Program

The objective of the Rural Electrification Program is to provide electricity through the ECs in accordance to the National Electrification Administration mandate “to pursue the total electrification of the country”.

When the Rural Electrification Program started in 1969, the level of electrification was at 19% and was only concentrated in cities and major economic centers. With the partnership of the government through the National Electrification Administration and its implementing arms, the electric cooperatives, the electrification level continued to rise. To account for the level of accomplishments, the Philippine Statistics Authority’s 2015 Census of Population was used as a basis for potential consumers.

For the fourth quarter of 2021, 99 out of 121 ECs are with 91% and above energization level. Of the 99 ECs, 85 have 100% accomplishment. The majority of ECs with 100% energization level are Green and Yellow-1 ECs with 49 and 33, respectively, while Yellow-2 and Red had 1 EC and 2 ECs, respectively. On the other hand, 9 ECs have a level of energization below 70%, most of which come from Red ECs (Table 8). There are a total of 11 ECs who attained 100% energization for 2021 (Table 9). For a more comprehensive data, refer to Appendix D.

Table 8. 2021 Q4 Energization Level

Energization Level	EC Classification					Total	%
	Green	Yellow-1	Yellow-2	Red			
100	49	33	1	2	85	70	
97-99	3	1	1	0	5	4
