"The 1st Performance Governance System-Institutionalized National Government Agency"
57 NIA Road, Government Center, Diliman, Quezon City 1100

08 June 2015

MEMORANDUM No. 2015-013

TO : ALL ELECTRIC COOPERATIVES
SUBJECT : Testing of the New NEA ICT Infrastructure

Part of the NEA's ICT upgrading is to provide a stable and resilient infrastructure. Included in the upgrading are the acquisition of data communication, load balancing and security appliance that will match the increase of internet bandwidth. This is to support the IT-based online reporting and other related activities for both the NEA and the ECs.

Scheduled this month is the testing of NEA's load balancing equipment. This equipment will process the bandwidth distribution/allocation of the combined internet services provided by GLOBE, BAYANTEL and the Department of Science and Technology.

In order for us to evaluate load balancing capabilities and the automatic bandwidth distribution, may we request for the resubmission/forwarding to NEA from June 19 to 23, 2015 all your reportorial documents submitted during the last week of May 2015. The activity is just to repeat the process and is only part of the NEA's testing procedures and will not be treated as a regular/routine reportorial submission.

Your active involvement and participation in this testing activity will help us determine the efficiency, stability, sustainability and strength of our ICT system.

If you observe any technical and/or non-technical or unusual finding or events during and/or after the submission testing, kindly send your feedback through these email addresses: itsddtest@nea.gov.ph or itsddtest@gmail.com or call our technical secretariat, Ms. Rhodora de los Reyes of ITCSD at telephone numbers 02-9292171 or 02-9291909 local 124.

Thank you for your usual support and cooperation.
