

MEMORANDUM NO. **2022-53**

TO : **ALL ELECTRIC COOPERATIVES (ECs) General Managers,
Acting General Managers and Project Supervisors**

SUBJECT : **BARANGAY ENERGIZATION MATRIX (BEM)**

DATE : **OCT 27 2022**

BACKGROUND

The level of barangay energization is a constant concern in presenting the accomplishment of the Rural Electrification Program. This is brought about by constant requests for energization and inquiries/feedbacks from local officials and monitoring agencies during budget deliberations in Congress/Senate and various instances.

RATIONALE

1. To determine the level of energization per barangay: served 100%; substantially served (80%-99%); partially served (1%-79%); unserved (0%).
2. To serve as basis in determining the scope of interventions and appropriate energization scheme to attain 100% energization.
3. To support requests for financial assistance and allocation from the National Government through DOE, DBM, Congress/Senate and other institutions.

MECHANICS

1. Identify all barangays being served per city/municipality.
2. Plot the latest potential households based on the prevailing issuance* of census of the Philippine Statistics Authority (PSA) and the corresponding number of consumer connections.
3. The summary per city/municipality should tally with the connections Data Entry Template (DET) being uploaded in the NEA BIT.

*Currently is the 2015 Census of Population and Households

4. The matrix will serve as an attachment to the NEA BIT Connections DET, thus, is due on or before the 15th day of the succeeding month and based on the prescribed format:

BARANGAY ENERGIZATION MATRIX (BEM)

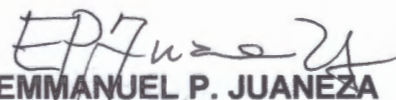

As of _____

EC	Region	Province	Cong'l District	City/ Municipality	#	Barangay	Potential Connections (2015 Census)	Actual Connections			% Energized	Remarks
								ON-GRID	OFF-GRID	TOTAL		

The submission of the BEM will form part of the connections DET due on November 15, 2022 onwards and will be considered in the EC Overall Performance Assessment on the Level of Energization.
