

02 May 2013

MEMORANDUM No. 2013-009

**TO : ALL ELECTRIC COOPERATIVES (ECs)**

**SUBJECT : RESULT OF YEAR 2012 EC OVERALL PERFORMANCE  
ASSESSMENT USING THE KEY PERFORMANCE STANDARDS (KPS)**

---

CONGRATULATIONS TO ECs OF REGION VII AND CARAGA FOR ALL ATTAINING A RATING OF AAA (TRIPLE A).

The Assessment of EC Overall Performance using the Key Performance Standards (KPS) was adopted to measure the ECs' financial, institutional and technical performance as distribution utilities. More specifically, the assessment covers the ability of ECs to secure power contracts with power suppliers, fulfill obligations and attain financial and technical operations at the highest standards guided by strong governance system within and outside of the ECs, thus, ensuring ECs' credit worthiness, level of development and protection of consumers.

For the first run of the EC overall performance assessment using the KPS, 99 ECs are included in the evaluation. However, 10 ECs were excluded in the assessment for reasons indicated: covered by the policy on private sector participation (ALECO and PELCO II); with governance and legal issues (DANECO); and part of the crafting of the plan for the peace process in Mindanao (TAWELCO, SIASELCO, SULECO, BASELCO, CASELCO, LASURECO, and MAGELCO)

The attached result of assessment using the transitory guidelines issued last 12 March 2013 and as presented to the NEA Board of Administrators indicates the ECs' 2012 performance as summarized below:

Rating	No. of ECs
AAA	50
AA	13
A	4
B	14
C	12
D	6
Excluded	10
<b>Total</b>	<b>109</b>

Generally, the overall assessment shows good results as follows:

1. **Financial.** Forty two (42) ECs got perfect score of 30 points on this parameter which shows ECs' full compliance to debt ratio, debt service cover, quick ratio, payment to power supplier, payment to NEA, average collection period, and profitability. However, there are 14 ECs which fall short in payment to power suppliers and profitability parameters. These ECs need to institute concrete measures to improve liquidity that will ensure timely payment of obligations to power suppliers thus avoiding power disconnection.

2. **Institutional.** While only 21 ECs garnered perfect score of 35 points in this parameter, a great number of ECs complied with the customer service standards and likewise met the required percentage in AGMA attendance and district election turn-out.

The issue on governance remains to be a major concern. The review of audit results and the current issues prevailing in some ECs revealed weaknesses in systems and procedures, internal control and accounting and auditing standards.

With regard to information, education and communication technology (IECT), almost 50% need to enhance communication capability that will encourage consumer access to EC information.

3. **Technical.** Seventy-three (73) ECs got perfect score of 30 points. Of the 99 ECs assessed, 85 are compliant to SAIFI standard of 25 interruptions per consumer per year and 89 ECs are compliant to SAIDI standard of 2,700 minutes unplanned interruption per year. There are however 26 ECs which failed in either SAIFI, SAIDI or SL performance.

On system efficiency, there are 23 ECs having single digit SL while 77 are within the cap of 13%. The five (5) ECs which have the lowest SL are: DIELCO (5.07), MORESCO I (5.24), SIARELCO (6.05), CEBECO III (6.46), ASELCO (6.77). All ECs met the 90% standard for power factor.

4. **Reportorial Requirements.** Only four (4) ECs were not able to submit all the reports needed in the assessment.

We congratulate the 50 ECs which garnered the highest rating of AAA for being compliant to all the four (4) parameters: Financial, Institutional, Technical and Reportorial Requirements. We reiterate our commendation for ECs of Region VII and CARAGA for continuing to excel in their respective operations.

It is worth citing that despite operational challenges, LASURECO was able to revitalize itself by the improvement of system capacity thus boosting distribution efficiency specifically the reduction of system loss from 57% in 2005 to 18% in 2012. Those ECs with below standard ratings are enjoined to review existing programs and to adopt new strategies that will ensure the attainment of goals and targets.

We also attached the 2012 Classification of ECs using the 3-year average of volume of sales, connections, and kilometer of lines constructed. The number of ECs classified as Mega Large (45), Extra Large (27), Large (16), Medium (7) and Small (4) are maintained.

The yearly EC overall assessment shall be a continuing process, the guidelines of which will be further reviewed to be more responsive to the needs of the industry.

Finally, this assessment result shall not be the basis for any adjustment in salaries and benefits of coop officers and employees. The revised guidelines on this matter shall be issued within the second quarter of this year.

Again, congratulations and let us keep the light shining!
